Curriculum & Technology Immersion in the Secondary Social Studies Classroom

Curriculum & Technology Integration Training 4-Day Workshop

The i³ professional development program immerses educators in a 24-hour, hands-on training that models successful curriculum & technology integration in the secondary Social Studies classroom. The training facilitates change in the individual educator's instruction methods and their classroom design, resulting in greater student achievement.

Participants journey with their facilitators through multiple technology-infused lessons, focusing first on curriculum standards, and second, on technology integration strategies where the focus is on becoming comfortable with technical skills. Educators **participate** in technology-infused lessons where classroom management strategies and best-practice teaching designs are **modeled and practiced**. Teachers **read and discover** educational pedagogy, leading to a realization of the need for change. This journey brings a focus on curriculum integration while proficiency with productivity software, web based curriculum resources, electronic literature, email and multimedia resources is built.

Sampling of Instructional Topics:

- Assessment strategies for the technology infused lesson
- Tapping into technology resources
- Planning effective lessons
- Teaching in the one-computer classroom
- Managing a technology-rich classroom
- Creating technology based-projects and activities
- Operating System basics
- Word Processing, Spreadsheets
- Draw/Paint
- Multimedia hardware/software
- Video tools
- Email
- Internet Resources

Proven Outcomes:

- Increased level of comfort with technology.
- Improvement of hardware and software knowledge.
- Dedication of more class time to the overall use of computers and related technologies integrated into the curriculum.
- Increase in the number of instructional purposes for which computers and related technologies are used in the classroom
