# Leading Technology in Today's Schools

## The Yellow Brick Road- Leading Technology in Today's Schools 1 or 2-Day Workshop Available

i<sup>3</sup> provides Administrator Training that immerses system and school level leaders in a hands-on, participatory 2-day course that provides an understanding of curriculum and technology integration, assessment of teachers in that setting, and the knowledge to lead a technology-infused school and system. As technology becomes more prevalent in today's schools, it is the role of administrators to provide the vision for how this valuable resource can make a positive impact on their faculty, students and constituents.

### ***Some Instructional Components Include:***

#### **Curriculum and Technology Integration**

- What is the technology infrastructure needed for a system/school?
- What does a technology-integrated classroom look like?
- How do I assess teachers in a technology-integrated classroom?
- What are the newest technologies for schools, classrooms, and student learning?
- What professional development is needed for teachers?

#### **Managing, Funding, Communicating**

- What technology skills do administrators need to effectively lead a technology-rich school system/school?
- How can administrators use templates to make management easier?
- What funding sources are available to provide the technologies?

#### **Planning for Success**

- What is the school technology plan? How to develop & implement the plan?
- What are the roles and responsibilities of a technology team?
- How can administrators assess the overall technology status and usage?
