Research & Technology Workshop

“Research & Technology: A Disaster Waiting to Happen”

1-Day Workshops Available

Executing meaningful research with electronic resources can be daunting. This hands on workshop will take participants on a journey through the world of the “Natural Disaster” by utilizing various research models and information technologies. Participants will role-play, as teams of researchers they will strengthen their Internet searching skills while using various Internet resources as they gather information that may save their life.

Instructional components include:

- Hands on computer usage
- Internet searching strategies
- Web site evaluation
- Various research processes & skills
- Mapping activity and group collaboration

Software Used:

- Inspiration Software
- Web Browser
- MS Word or AppleWorks
