# Video Jammin Workshops

## Video Jammin, Video Projects across the Curriculum 1 & 2 Day Workshops Available

This workshop will provide educators with a new look at the possibilities of video and the production process in their classroom. The focus is on teaching Language Arts based units to elementary & middle school students while incorporating Media & Visual Literacy.

Teachers will discover how they can turn their student's projects into exciting multimedia events with very little equipment. The workshop explores the three phases of the production process and how students learn the importance of teamwork and consensus building. The workshop models how a basic language arts unit on poetry can become "Video Poetry", a compilation of visually rich images and sounds that students utilize to communicate the mood and feeling of the poem. We will explore how current events or personal experiences can be transformed into "Public Service Announcements" and "Video Journals".

***\*\*Digital Jammin' also available- Utilize your digital video camera and iMovie 2 or Windows Media Maker software to shoot, edit and enhance your video. Create transitions, sound effects, and special effects that add a professional quality to your students' projects. Learn how to save to CD and to the Web. This workshop merges the original Video Jammin workshop with the new digital desktop editing systems.***

To schedule training or to request additional information and a more detailed packet describing this training please contact Floyd Braid at 678-777-4814 or email [fbraid@i3forteachers.com](mailto:fbraid@i3forteachers.com)
